PROFESSIONAL SUMMARY

Cybersecurity student with hands-on experience in network reconnaissance, vulnerability assessment, and basic penetration testing. Familiar with tools like Nmap, Dirsearch, Nuclei, and OWASP Top 10 concepts. Actively learning SOC workflows, threat analysis, and security monitoring with a strong interest in real-world incident response and risk assessment.

HANDS -ON EXPERIENCE

Cybersecurity Practice & Labs Self-Directed

- Performed reconnaissance and vulnerability discovery on test environments using Nmap, Dirsearch, and Nuclei
- Analyzed web application behaviors and HTTP responses to identify potential security misconfigurations
- Studied OWASP Top 10 vulnerabilities and mapped them to real-world exploitation scenarios
- Practiced security scanning workflows in Linux environments
- Researched emerging cyber threats, common attack vectors, and defensive strategies

EDUCATION

Bachelor's of Computer Application August 2024 – June 2027
Jharkhand rai university
Specialization in computer science and information technology
(currently in 4th semester)

TECHNICAL SKILLS

Cybersecurity & Networking

- Network Security Fundamentals (TCP/IP, DNS, HTTP/HTTPS)
- OWASP Top 10 (SQLi, XSS, Auth Issues, Misconfigurations)
- Vulnerability Assessment & Reconnaissance • Basic Penetration Testing Concepts
- Risk Analysis & Threat Identification Skills

Tools & Technologies

- Nmap – Port scanning, service detection
- Dirsearch – Web directory brute-forcing
- Nuclei – Automated vulnerability scanning
- Wireshark – Packet analysis (basic filters, traffic inspection)
- Metasploit – Framework familiarity (basic exploitation workflow)
- Linux (Ubuntu/Kali), Bash basics
