

SABIR QADAR

Software Development Engineer | Full Stack Developer | Python Developer

Ranchi, Jharkhand, India | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Computer Applications undergraduate and Full Stack Developer Intern specializing in Python-based backend engineering, relational database design, and web application development using Django, HTML, and CSS. Proficient in writing maintainable, version-controlled code with Git/GitHub and applying core computer science fundamentals — data structures, OOP, DBMS, and networking — to deliver functional, scalable software. Complements development expertise with practical knowledge of network security and vulnerability assessment tools. Seeking a Software Development Engineer or Full Stack Developer role to deliver high-quality, production-grade software solutions.

TECHNICAL SKILLS

Languages: Python, Java, C

Web Technologies: Django, Flask, HTML, CSS, scikit-learn, NLTK

Databases: MySQL, SQL

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, DBMS, Operating Systems, Software Development Lifecycle, OWASP Top 10 Fundamentals

EXPERIENCE

Full Stack Developer Intern — Codezeal Technology Pvt. Ltd. / BrightCode

June 2026 – Present

- Engineer server-side web applications using Python and the Django framework, implementing MVC architecture, URL routing, and template-driven views.
- Build responsive, cross-browser front-end interfaces using semantic HTML5 and CSS3, ensuring consistent UX across device sizes.
- Design and integrate relational SQL database schemas with backend application logic to support reliable, data-driven functionality.
- Practice collaborative software development using Git for version control and GitHub for code review, branching, and team-based feature delivery.
- Apply industry-standard Software Development Lifecycle (SDLC) practices under senior engineer mentorship, including requirement analysis, modular coding, and iterative testing.

PROJECTS

Desktop-Based Employee Management System | Python, MySQL, Tkinter

Repository: <https://github.com/Sabir-Qadar/Desktop-based-Employee-Management-System-using-Python-MySQL>

- Architected a desktop-based employee record management system using Python and a normalized MySQL relational database, implementing full Create, Read, Update, and Delete (CRUD) functionality.
- Designed a Tkinter-based graphical user interface integrated with optimized SQL queries for efficient data entry, retrieval, and validation.
- Implemented persistent database connectivity and structured data handling, improving record accuracy and reducing manual data management overhead.

Personal Developer Portfolio Website | HTML5, CSS3, GitHub Pages

Repository: <https://sabir-qadar.github.io/Portfolio/>

- Engineered and deployed a fully responsive personal portfolio using semantic HTML5 and modern CSS3, optimized for performance and cross-device rendering.
- Structured the site to programmatically present GitHub repositories, technical skills, and project documentation, strengthening professional branding and recruiter visibility.

SENTIENT — AI-Powered Sentiment Analyzer | Python, Flask, scikit-learn, NLTK

Repository: <https://github.com/Sabir-Qadar/SENTIMENT-ANALYSER-AI->

- Built an NLP-based sentiment analysis system trained on 400,000+ Amazon product reviews, using TF-IDF vectorization and a Naive Bayes classification model.
- Deployed the trained model via a Flask web application for real-time text classification, demonstrating end-to-end machine learning pipeline development from preprocessing to inference.

EDUCATION

Bachelor of Computer Applications (BCA) — Jharkhand Rai University, Ranchi

Currently in 5th Semester

ACHIEVEMENTS

- Selected for a Full Stack Development Internship at Codezeal Technology / BrightCode.
- Independently designed, built, and deployed multiple software development and cybersecurity projects.
- Actively strengthening Data Structures and Algorithms proficiency while maintaining an active GitHub profile and technical portfolio.
